Note: AI-provided responses for service summary example for Army branch with MOS specialty code and what are 1 to 3 accomplishments for the service summary.

Select branch: *Army, Navy, Marine Corps, Air Force, Space Force, Coast Guard*

Specialty code: *25B*

Note: 25B is MOS Specialty Code for information Technology Specialist.

Service Summary:

Versatile IT Operations Supervisor with 8 years of active-duty U.S. Army experience (MOS: 25B). Directed network infrastructure, cybersecurity compliance, and hardware/software troubleshooting for a 500-person brigade tactical operations center. Managed $2.3M in communications and IT assets with 100% accountability. Led a team of 6 junior technicians through 2 overseas deployment cycles with zero mission-critical downtime.

Accomplishment 1:

Network Infrastructure Upgrade: Architected and deployed a brigade-level tactical network upgrade, improving data transfer speeds by 35% and securing cross-branch communications for 500+ active users.

Accomplishment 2:

Asset & Budget Management: Maintained 100% accountability of a $2.3M IT and communications equipment inventory across two deployment cycles, resulting in zero losses and flawless annual audit ratings.

Accomplishment 3:

Team Leadership & Performance: Mentored and certified 6 junior IT technicians, boosting the team's tier-1 technical issue resolution rate by 40% and eliminating reliance on external technical support contractors.

Target civilian role*: Network Administrator*

Target career path: *IT/Cybersecurity*

Select branch: *Army, Navy, Marine Corps, Air Force, Space Force, Coast Guard*

Specialty code: *25B*

Note: 25B is MOS Specialty Code for information Technology Specialist.

Service Summary:

Operations Team Supervisor and Combat Leader with 8 years in the U.S. Army (MOS: 11B). Supervised a 9-person tactical team during high-tempo overseas operations. Coordinated joint security patrols, risk assessments, and tactical training while maintaining 100% accountability of sensitive weapons and communication gear.

Accomplishment 1:

Operational Readiness: Directed the training, tactical readiness, and safety protocols for a 9-person team, achieving a 100% pass rate on all mission-essential task list evaluations.

Accomplishment 2:

Logistics & Accountability: Supervised the tracking, maintenance, and secure deployment of $450K in sensitive combat gear, weapons systems, and night-vision optics with zero property loss or damage.

Accomplishment 3:

Cross-Functional Coordination: Coordinated logistics and real-time communications with multi-national forces during high-stakes security operations, mitigating risks and ensuring 100% mission success.

Target civilian role*: Network Administrator*

Target career path: *IT/Cybersecurity*

Job description text:

Job Summary
We are seeking an experienced, proactive IT Systems & Network Administrator to oversee, maintain, and secure our enterprise computing environment. In this role, you will manage network infrastructure, server stacks, directory services, and endpoint security to ensure maximum uptime, compliance, and operational efficiency. You will also provide Tier 2/3 technical escalation support and lead IT lifecycle management projects.
Core Responsibilities

- ***Infrastructure Management:*** *Install, configure, and maintain corporate servers, local area networks (LANs), wide area networks (WANs), and routers.*
- ***Directory Services & Identity Access:*** *Administer user accounts, security groups, and access permissions via Microsoft Active Directory, Azure AD, or Exchange environments.*
- ***Cybersecurity Compliance:*** *Monitor network traffic for security anomalies, perform regular vulnerability patching, and ensure all systems adhere to corporate information assurance and compliance rules*
- ***Asset Accountability:*** *Oversee the lifecycle tracking, inventory audit, and hardware/software provisioning for enterprise hardware and software licenses*
- ***Disaster Recovery:*** *Manage, test, and implement automated routine backup plans and business continuity protocols to safeguard corporate data*
- ***Technical Support Escalation:*** *Serve as the final escalation tier for complex hardware, virtualization, connectivity, or system software outages.*

Meanings of Military Job and Specialty Codes

- **MOS (Military Occupational Specialty):** Used by the **Army** and **Marine Corps** to identify a specific job, training path, and set of duties. In the Army, it is part of a longer 9-character code (MOSC) that can include skill level and special qualifications; in the Marine Corps, it is a 4-digit number tied to an occupational field.
- **AFSC (Air Force Specialty Code):** Used by the **Air Force** (and adopted similarly) to classify career fields, skill levels, and specific duty positions using a 5-character code for enlisted personnel or a 4-character code for officers.
- **Rating (and Rate):** Used by the **Navy** and **Coast Guard** to designate a sailor's or coastguardsman's primary enlisted job family (the "rate" combines the rating with their paygrade, such as HM2 for an E-5 Hospital Corpsman).
- **SFSC (Space Force Specialty Code):** Used by the **U.S. Space Force** for specialized career fields tailored to space, cyber, and intelligence operations (derived and evolved from Air Force structures).
- **NEC (Navy Enlisted Classification):** A 4-digit code added on top of a Navy rating to capture specialized, secondary, or advanced technical skills and training beyond a sailor's primary rating.

Other Military Codes and Identifiers

Veterans' service records and DD-214 forms often feature additional supporting codes that specify extra training, status, or designators:

- **Officer Designators (Navy/Marine Corps):** Four-digit or alphanumeric codes that identify an officer's specific community or career path (e.g., restricted line, unrestricted line, staff corps).
- **DMOS / PMOS / SMOS (Army/Marines):**
  - *PMOS* (Primary MOS): A service member's main, trained specialty.
  - *DMOS* (Duty MOS): The actual job role they are currently assigned to perform in a specific unit.
  - *SMOS* (Secondary MOS): Any additional MOS a service member holds through extra cross-training.
- **SQI (Special Qualifications Identifier) & ASI (Additional Skill Identifier):** Used in the Army as single-letter or letter-number suffixes attached to an MOS to show special schools or capabilities (e.g., Airborne, Ranger, or specific language proficiencies).
- **AETC / Special Duty Codes:** Tracking codes for instructors, recruiters, or specialized operational assignments.
